The New Zealand Dental Association, in conjunction with the Ministry of Health, is offering free educational workshops for rest home staff and other caregivers. The number of older adults retaining their natural teeth is increasing. Many older people are dependent on caregivers for their hygiene requirements including oral health care. Many oral health problems can be avoided by providing simple and consistent care. These workshops aim to provide an opportunity for hands-on training for caregivers of older people. These workshops are free and are already proving very popular but places are limited to 50 per venue. Registration a MUST.

Sorry but only two people per facility please

Name _____
(will go on the Attendance certificate so please print clearly, one form per person)

Facility _____

Which location will you attend: _____
